EMBEDDING INNOVATIONS

ANSSI RULES COMPLIANCE

Goals

- **Introduce Security Rules** provided by French's security government agency ANSSI

- **Test the compliance** of a GNU/Linux OS according to these Security Rules

- Practice bash script to evaluate the compliance

- Use **Ubuntu 22.04** environment (but you could use your own GNU/Linux distribution)

What you need to send Nicolas and I?

- **One archive** per group of 2 students with
  - One bash script per rules
    - The *minimum* **output of the script shall be OK or KO** depending of the system

  - **README** to explain how to start your scripts

- **Rules to test**
  - R10, R11, R12, R13
  - R22, R23, R24
  - R32, R36, R38
  - R47
  - R55 (with sshd running in it. See R45 as example)
